Ocean Network Express Pte. Ltd.

ONE Jointly Conducted with PSA an Immersive Educational Study Tour

3rd Jan 2019 – Singapore – Ocean Network Express (ONE) collaborated with PSA Singapore (PSA) for a joint corporate social responsibility (CSR) initiative to promote the learning of container shipping for elementary students from The Japanese School Singapore. The initiative is deemed to help the students to better understand the operational activities of a container terminal, as to support the school's curriculum in trade and transportation.

Led by a dedicated team from ONE, over 240 participants including teachers attended the educational activity which was held at the PSA's Pasir Panjang Terminal on 7 and 14 December 2018. As part of the event, participants were educated on the operational procedures of container handling during the berthing and departure of container vessels. Specifically, this encompassed a step-by-step process of how containers are handled either manually or through advanced automated systems. To better augment the students' understanding of the subject, a fun-filled informational booklet was further developed by ONE and distributed to each of the participant for their additional learning.

As a whole, and with such a form of CSR program delivery, ONE has managed to play a vital role in educating the young public on facets of container shipping, as well as to contribute to a better awareness of this essential industry.
